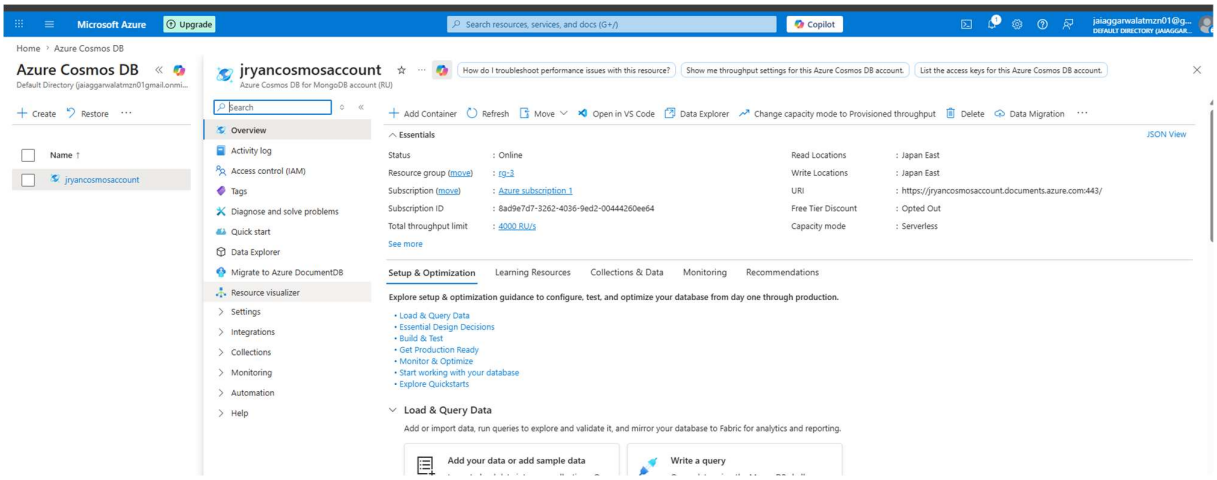
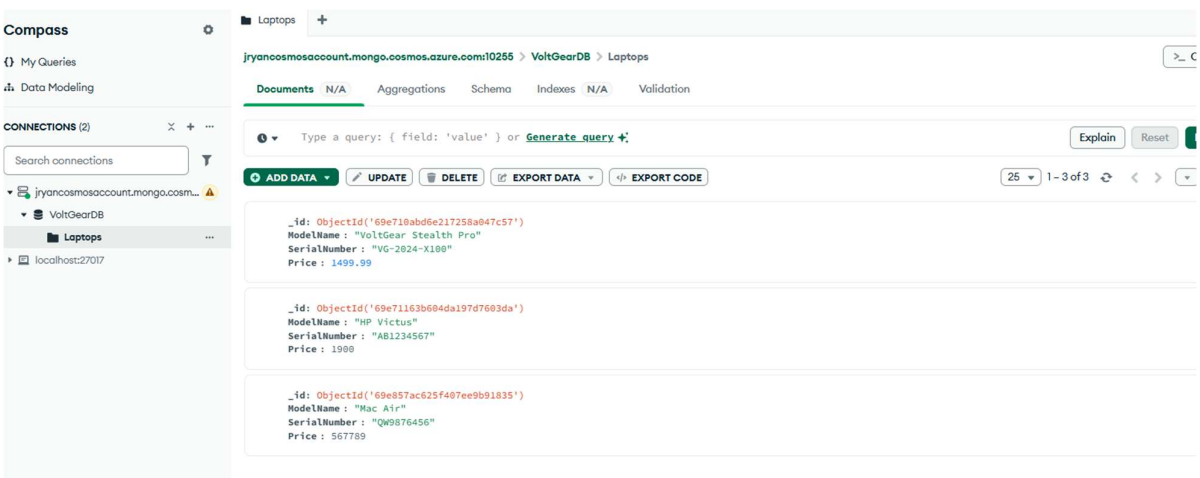
1. Creating Cosmos DB in Azure



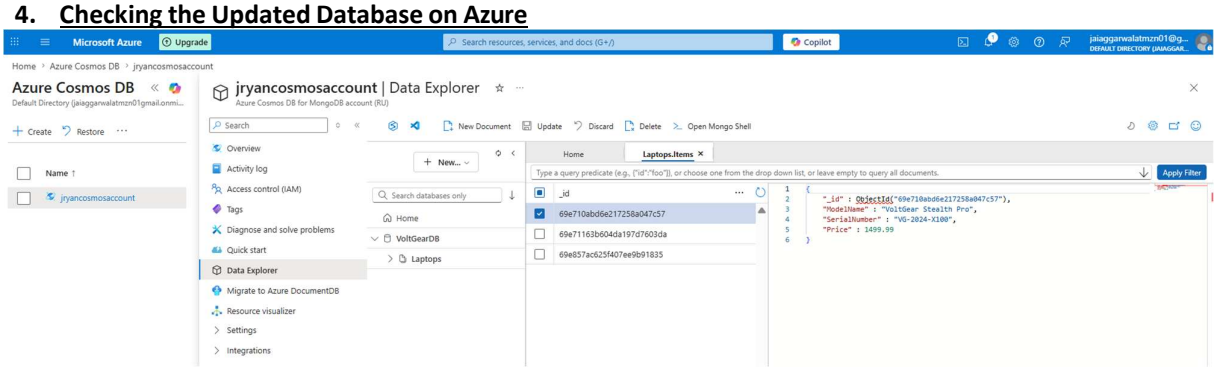
2. Copying the connection string

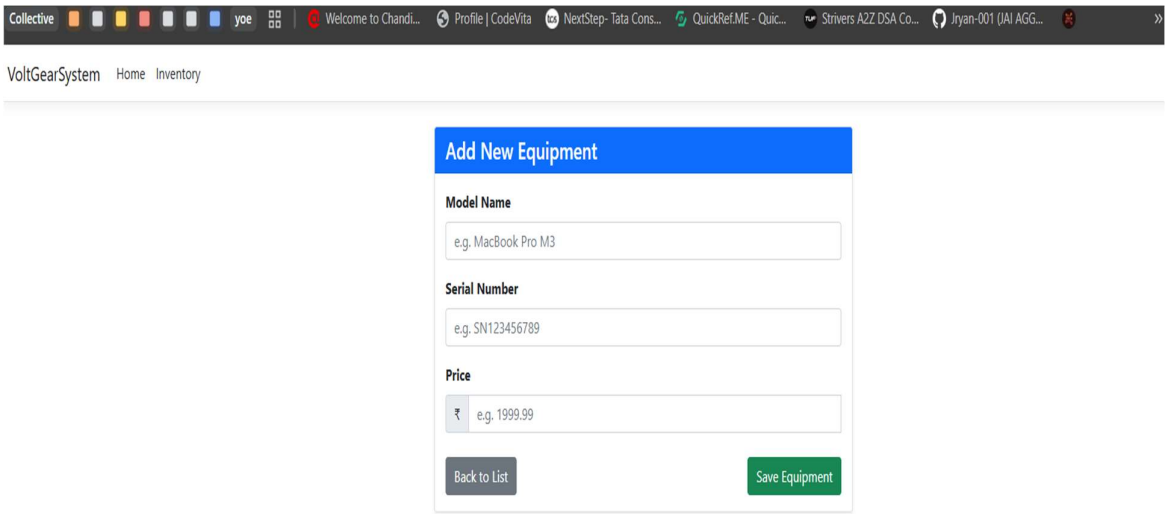
```
"ConnectionString":
"mongodb://jryancosmosaccount:2dKBzgSYXUX5Tai0IJqdnKU6xTe1ohB3WUq6m1ZNOgFd9C64fgGLX9AQTSB8IpzRExCIdo2z35ZpACDb2rNplA==@jryancosmosaccount.mongo.cosmos.azure.com:10255/?ssl=true&replicaSet=globaldb&retrywrites=false&maxIdleTimeMS=120000&appName=@jryancosmosaccount@",
```

3. Opening the Compass and Adding a connection using this Connection String.



4. Checking the Updated Database on Azure



5. Connecting MVC to Mongo DB Database


6. Inserting the Feedback Values in MVC
